| <b>Windsor-chair Making in America</b> - Nancy Goyne Evans - 2006<br>Drawing principally on original source materials, Nancy Goyne Evans's elegantly written and extensively illustrated Windsor-Chair Making in America presents an authoritative and absorbing historical picture of the vernacular chair shop and industry. Of the book's five chapters, three deal extensively with the craft shop. Evans discusses everything from structure to tools and equipment, from shop personnel to power sources, and from raw materials to ornament, both painted and stenciled. A chapter on marketing explores the booming Windsor-chair trade in the American coastal South and the islands of the Caribbean, furniture distribution to local, overland, and overseas markets, and general methods of doing business. Another section explores consumerism and the use of Windsor furniture in domestic and public settings. Students and interpreters of American material culture and life will find here an abundance of new material organized and presented to provide comprehensive insights into craft life and product distribution in America. Evans's book should have pride of place in the libraries of collectors, curators, practicing and amateur furniture craftsmen, and anyone interested in early American studies trades, folk art, and pre-industrial technology. This book includes an extensive index, detailed maps, an indispensable paint color chart based on more than 1,200 references, a select bibliography, and a wealth of photographic reproductions. |

| <b>Building Codes Illustrated for Healthcare Facilities</b> - Steven R. Winkel - 2007-04-13<br>Now more than ever, architects need an interpretive guide to understand how the building code affects the early design of specific projects. This easy-to-use, illustrative guide is part of a new series covering building codes based on the International Building Code for 2006. This book presents the complex code issues inherent to healthcare facility design in a clear, easily understandable format.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| <b>Building Codes Illustrated for Elementary and Secondary Schools</b> - Steven R. Winkel - 2007-04-13<br>Now more than ever, architects need an interpretive guide to understand how the building code affects the early design of specific projects. This easy-to-use, illustrative guide is part of a new series covering building codes based on the International Building Code for 2006. This book presents the complex code issues inherent to elementary and secondary school design in a clear, easily understandable format.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

Winkel - 2007-04-13<br>Now more than ever, architects need an interpretive guide to understand how the building code affects the early design of specific projects. This easy-to-use, illustrative guide is part of a new series covering building codes based on the International Building Code for 2006. This book presents the complex code issues inherent to elementary and secondary school design in a clear, easily understandable format.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

Kochenderfer - 1989                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| <b>HomeMade Modern</b> - Ben Uyeda - 2015-11-17<br>You can make the furniture you want at a fraction of the price of store-bought furniture. Not only will you save tons of money, but you'll also make environmentally sustainable pieces that are solidly built, using real materials like metal, wood, concrete, and other recycled ready-mades. The projects in this book don't require special skills, prior experience, or even a garage full of tools. You'll be walked step-by-step through the process of making furniture, from where to buy the materials (or where to scavenge) to how to make the most of the tools you own.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| <b>American Furniture in the Metropolitan Museum of Art</b> - Frances Gruber Safford - 2007<br>The Metropolitan Museum's preeminent collection of early colonial furniture is expertly documented in this long-awaited publication. It covers the full spectrum of furniture forms made during the 17th and early 18th centuries—from chairs and other seating to tables, boxes, various types of chests and cupboards, and desks. Each of the 141 objects is thoroughly described with detailed information on provenance, construction, condition, inscriptions, dimensions, and materials. Photographed anew in color for this volume, each piece is explicated in terms of the styles and craftsmanship of the period and is evaluated in light of comparative pieces in public and private collections throughout the country. One appendix contains photographic details of construction and decorative elements, and another has drawings of joints and moldings.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| <b>American Furniture in the Metropolitan Museum of Art</b> - Frances Gruber Safford - 2007<br>The Metropolitan Museum's preeminent collection of early colonial furniture is expertly documented in this long-awaited publication. It covers the full spectrum of furniture forms made during the 17th and early 18th centuries—from chairs and other seating to tables, boxes, various types of chests and cupboards, and desks. Each of the 141 objects is thoroughly described with detailed information on provenance, construction, condition, inscriptions, dimensions, and materials. Photographed anew in color for this volume, each piece is explicated in terms of the styles and craftsmanship of the period and is evaluated in light of comparative pieces in public and private collections throughout the country. One appendix contains photographic details of construction and decorative elements, and another has drawings of joints and moldings.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| <b>Building Essential Vocabulary, Ages 4 - 9</b> - Sherrill B. Flora - 2010-05-18<br>Facilitate a love of language in children of all ages with Building Essential Vocabulary! This 96-page book includes more than 400 reproducible photo cards, games, puzzles, and activities that provide vocabulary instruction. The activities cover themes such as actions, colors, shapes, clothing, food, everyday objects, school tools, people, careers, toys, and family. This book is great for classroom activities as well as study and practice at home. The book supports NCTE, NAEYC, and NCTM standards.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| <b>Building Essential Vocabulary, Ages 4 - 9</b> - Sherrill B. Flora - 2010-05-18<br>Facilitate a love of language in children of all ages with Building Essential Vocabulary! This 96-page book includes more than 400 reproducible photo cards, games, puzzles, and activities that provide vocabulary instruction. The activities cover themes such as actions, colors, shapes, clothing, food, everyday objects, school tools, people, careers, toys, and family. This book is great for classroom activities as well as study and practice at home. The book supports NCTE, NAEYC, and NCTM standards.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| <b>Cabinet Making for Beginners Handbook</b> - Stephen Fleming - 2020-09-29<br>"A kitchen without a cabinet is like a body without a soul." This is what a wise cabinetmaker uttered when I asked what cabinet making meant to him. I have been practicing all the aspects of woodworking like Joinery, Woodturning, and Furniture making along with Cabinet Making, and I must say this art provides the maximum chance of impacting the overall look of your kitchen or bathroom and eventually, your home. Cabinets, for me, are an extension of your personality and a great way to express yourself. When I first started woodcraft, I looked desperately for a go-to guide about the specific processes and exact tools required. The content I found online was total information overload and wasn't presented sequentially. The books were either focused on just a few processes or assumed that I already had the necessary information. Many of the books were also very dated. There are two ways of learning: learning from SMEs (Subject Matter Experts) with years of experience, and the other is to acquire from people who are just a few steps ahead of you in their journey. I fall into the latter group. I've spent five years on this hobby and am still learning from the experts. I still remember my initial doubts and the first tips that helped me. This book is for those who are still running their first lap (0-3 years) in wood-crafting and want to gain a holistic idea of the necessary processes and tools. I've included photographs of realistic beginner projects, and I'll explain the processes and standard operating procedures associated with them. Below are the topics you would find inside: · Introduction to Cabinet Making · Cabinet Types, Doors, and Drawers · Tools used and best practices · Process and Techniques · 10 Beginner Projects · Recap and Safety Tips · Conclusion and Free Online Resources In the last chapter, I've provided a link to free online resources for planning your next projects. Cheers, and let's start the exciting journey! |
